

Cottonwood Wind Energy Center

Fact Sheet

About NextEra Energy Resources

- » A leading clean energy provider operating wind, natural gas, solar and nuclear power plants
- » A portfolio of power generating facilities across the United States and in Canada
- » The world's largest generator of wind and solar energy
- » A subsidiary of NextEra Energy, Inc., with headquarters in Juno Beach, Florida
- » Nearly all of the electricity we generate comes from clean or renewable sources
- » Visit us at NextEraEnergyResources.com

How a wind turbine works

- 1 A computer turns the nacelle and the rotor (which consists of three blades and a hub) to face into the wind. The turbine blades turn a generator to produce electricity. For safety purposes, the turbine shuts down automatically if the wind speed exceeds 55 miles per hour.
- 2 The electricity travels down the inside of the tower through electrical cables to a transformer at the base of the wind tower.
- 3 From the transformer, the electricity flows through an underground collection cable to an on-site substation.
- 4 From the substation, overhead electrical cables take the electricity to an off-site substation and into high-voltage transmission lines.
- 5 The electricity goes from the high-voltage transmission lines into local distribution lines.
- 6 The electricity is then distributed to homes, schools, businesses and other consumers.

Overview

- » Generating capacity of 89.7 megawatts of wind energy, consisting of four 1.79, one 2.0 and 35 2.3-megawatt GE turbines
- » Began commercial operation in November 2017
- » Located in Webster County, Nebraska
- » Operated by a subsidiary of NextEra Energy Resources, LLC
- » Owned by NextEra Energy Partners, in which NextEra Energy Resources holds a majority equity interest. For more information, please view [our portfolio list](#).

Benefits

- » Provides employment opportunities
- » Adds tax base to the counties
- » Delivers payments to landowners
- » Creates no air or water pollution
- » Uses no water in power generation
- » Allows land to remain in agricultural use
- » Supports economy through purchases of regional goods and services
