

I want to take a moment to express my gratitude for the community's support of the Century Oaks Energy Storage project. At NextEra Energy Resources, we believe in working with and supporting the communities we serve, which is why it is important for us to engage with the public at every stage of development for this project.

Construction for the Century Oaks Energy Storage project is scheduled to begin on Monday, April 14. During construction, the project will benefit local businesses such as hotels, restaurants, gas stations and more by providing additional income.

Once operational, the Century Oaks Energy Storage project will help enhance the power grid's reliability.. The project is designed to reduce energy loss, replace more expensive and inefficient power generation units, and avoid the need for some system upgrades.

NextEra Energy Resources will work closely with Colfax Township and other stakeholders to keep the community informed on the construction timeline and important updates. I look forward to our continued relationship, thank you again for your ongoing support.

Chesten Goodman
