

Providing Energy Solutions

Energy continues to play a vital role in our economy and in our quality of life. NextEra Energy Resources, LLC, is committed to providing energy-related products and services that grow our economy, protect the environment and support our communities. We are the world's largest generator of renewable energy from the wind and sun. Nearly all of our electricity comes from clean or renewable resources, including wind, solar, natural gas and nuclear energy facilities that are located in 37 states and Canada. Our success reflects the solid business practices of our parent company, NextEra Energy, Inc., a Fortune 200 company and one of the nation's leading clean energy companies.

Offering a diversified portfolio of fuel sources

NextEra Energy Resources has a portfolio of power-generating facilities, totaling approximately 21,900 megawatts (MW) of capacity in the U.S. and Canada. This includes wind, solar, natural gas and nuclear energy resources.

We are primarily a wholesale power generator, operating power plants and selling the output to utilities, retail electricity providers, power cooperatives, municipal electric providers and large industrial companies.

Bringing experience in renewable energy

NextEra Energy Resources has been involved in clean energy development since the 1980s and now has a cumulative investment of more than \$30 billion in wind and solar energy facilities. We have earned a reputation for excellence and experience in developing, constructing and operating wind and solar projects across North America.

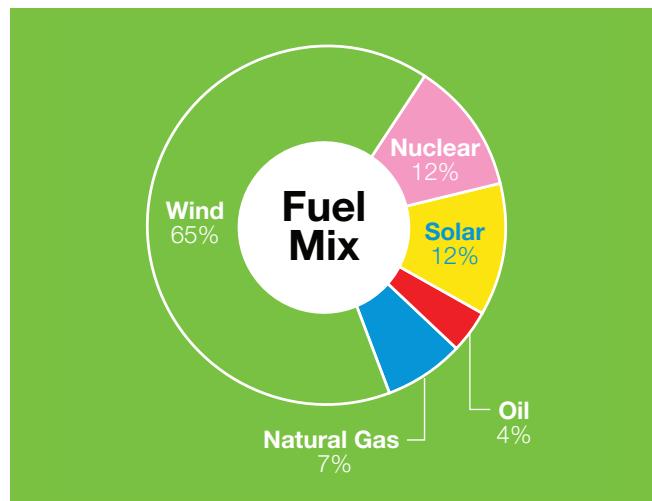

- » **Wind energy.** We own and operate 126 wind facilities in 19 states and Canada with more than 14,100 MW of capacity. We operate more than 9,800 wind turbines that are capable of generating enough electricity to power millions of homes.
- » **Solar energy.** We operate dozens of universal and small-scale solar projects across the U.S., generating more than 2,600 MW.

» **Battery energy storage.** We are a leader in the energy storage market. We have more than 145 MW of operational energy storage and a pipeline of development projects across the U.S. and Canada.

Providing other energy services to customers

NextEra Energy Resources has a number of energy-related businesses that help customers meet their energy needs. These include:

- » **Small-scale solar generation.** We provide custom-tailored solutions that allow customers to generate clean, reliable energy from their rooftops, parking structures and open land.
- » **Energy marketing.** NextEra Energy Marketing (NEM), LLC, is one of the top 10 marketers of power in the nation. NEM provides custom energy solutions for customers with specific needs.
- » **Retail market.** NextEra Energy Services and Gexa Energy serve customers in numerous U.S. retail markets.
- » **NextEra Analytics.** This subsidiary provides renewable energy consulting services using industry-leading scientific analysis for planning, siting and forecasting renewable energy projects.

Building partnerships across North America

Renewable energy projects represent a clean, cost-effective option to meet customers' energy needs. NextEra Energy Resources is building strong partnerships with companies across North America that are buying wind- and solar-generated electricity to provide to residential and commercial markets throughout their service areas. Many electric utilities, cooperatives and municipalities have joined with our company in providing this clean, renewable power to their customers.

Operating in harmony with the environment

NextEra Energy Resources promotes the generation of clean energy through the use of clean-burning fuels or renewable resources. We also incorporate environmental stewardship into the design, construction, operation and maintenance of our facilities. Through our commitment, we are working to ensure that the growing demand for power is met in the most environmentally responsible manner.
