

2021 Prospective Product Content Label¹

NextEra Energy Resources REC is a Renewable Energy Certificate (REC) product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, see <https://www.green-e.org/programs/energy>.

NextEra Energy Resources REC is sold in blocks of 1,000 kilowatt-hours (kWh). In 2021, NextEra Energy Resources REC is expected to come from following resources:

Green-e Energy Certified New ² Renewables in NextEra Energy Resources Wind REC		
Technology	Make-up of Product	Generation Location
Wind and Solar	100%	United States

¹ These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the REC you purchased.

² New Renewables come from generation facilities that first began commercial operation within the past 15 years or repowered facilities.

For comparison, the current average mix of resources supplying the U.S. includes: 40.3% natural gas, 19.3% coal, 19.7% nuclear, 19.8% renewables, 0.5% oil, 0.3% other gases, 0.1% other. (Source U.S. Energy Information Administration, Electric Power Annual, February 2021).

The average home in the U.S. uses 877 kWh each month in 2019 (Source: U.S. EIA, October 2020).
