Create Operational Efficiencies and Cost Savings Opportunities through Carbon Compliance

As you progress on your sustainability goals, your organization is likely searching for ways to transform energy data into actionable insights and achieve operational cost savings.

GOOD REPORTING STARTS WITH GOOD DATA

Companies that start tracking and actioning their energy data are poised to realize myriad benefits.

The process starts with gaining a comprehensive view of energy data. NextEra 360 is a robust energy-management software that gives you visibility into your energy use, helping you find ways to reduce energy costs and carbon emissions, manage risk and improve overall returns.

Reduce operational costs by up to 30%

Gain 1-3% in energy performance

Unlock up to 64% reductions in emissions*

NEXTERA 360 PROVIDES FAST, SIMPLE AND SECURE DATA COLLECTION

Generating a comprehensive view of energy and emissions can be difficult, costly and time consuming. NextEra 360 minimizes rework and risk across your value chain without the hassle of manual uploads or time-consuming custom software integration:

- ✓ Collect and report on data in real time
- ✓ Aggregate data across multiple sources and formats
- ✓ Monitor, predict and optimize asset performance

- ✓ Increase the operational efficiency of existing assets
- ✓ Track, monitor and report energy costs and carbon emissions
- ✓ Maximize your budget and resources with AI-driven energy data and insights

NextEra 360's comprehensive energy management software guides you to set up a strong energy data management program.
